Who is Sebright Products?

Since 1984, Sebright Products, Inc. has been a leading manufacturer specializing in the design and production of high-quality waste handling and recycling equipment. Established with a commitment to innovation and sustainability, Sebright Products offers a wide range of solutions, including compactors, balers, and dewatering equipment, tailored to meet the unique needs of various industries.

Known for their durability, efficiency, and advanced engineering, Sebright Products aims to enhance operational productivity while minimizing environmental impact, making us a trusted partner for businesses seeking reliable and sustainable waste management solutions.

Established in 1999, Bright Technologies, a specialty stainless steel division of Sebright Products, focuses on developing innovative equipment for liquid separation, solid waste reduction, and recycling, including a stainless steel dewatering baler (XCycler) and Belt Filter Presses.

Sebright Products and Bright Technologies offer equipment designed with quality components fabricated, installed, and serviced by us. This ensures you receive the best quality equipment and service after the sale.

Trusted Across Many Industries

EMPLOYEE STOCK OWNERSHIP PROGRAM (ESOP)

April 2025, Sebright Products Inc. announced that it had officially transitioned to a 100% employee-owned company. This milestone marked a significant step in the company's commitment to empowering its workforce and ensuring long-term sustainability and growth.

All employees at Sebright Products Inc. are now owners of the company through an Employee Stock Ownership Program (ESOP). This exciting new chapter for the company recognizes the incredible contributions of our employees while deepening our commitment to teamwork, inclusivity, innovation, and community. By giving our employees a true stake in our success, we're building an even stronger future together for them and for Sebright Products Inc.

The ESOP structure provides employees with significant benefits, including: enhanced financial security, increased engagement, and long-term stability.

CERTIFIED
QUALITY.
EMPLOYEE
OWNED.

Our employee-owned structure and ISO 9001:2015 certification reinforce our commitment to quality, consistency, and continuous improvement.

Sebright Products Inc. is an ISO 9001:2015 certified company. ISO 9001 is an international management system standard that specifies requirements for a quality management system (QMS).

Companies use the standard to demonstrate their ability to consistently provide products and services that meet customer and regulatory requirements, as well as the organizations, own requirements. By achieving ISO 9001 status, Sebright Products reinforces its position as a trusted partner to industries including manufacturing, municipal services, and environmental solutions.

ISO 9001:2015
CERTIFIED

Mission

To solve waste and recycling challenges through innovative engineering and manufacturing while upholding the highest quality and safety standards.

Vision

Become a Leader of Innovation, Quality, Safety, and Service to create a sustainable future for generations to come.

Values

QUALITY - Apply the highest standards of excellence to develop enthusiastically satisfied customers.

COMMUNITY - Support the individualism of our team members, customers, and communities to create a sense of belonging and trust.

SAFETY - Dedicate ourselves to providing a clean and safe work environment for our team members and safe equipment for our customers.

INNOVATION - Foster a culture that enhances creativity and teamwork to continuously grow as a company and individuals.

RESILIENCE - The ability to take on life's challenges and changes in stride and be open-minded for future opportunities.

Where It All Began...

In 1984, Dave Sebright, Brent Sebright, and Lee Murray founded Sebright Products with a clear vision for quality-driven solutions and lasting partnerships. Their leadership laid the foundation for a company that continues to grow while staying true to its roots.

Capabilities

ENGINEERING

Our engineering team uses advanced 3-D software for precise, efficient installations and custom solutions for diverse, challenging sites.

SERVICE

Sebright Products offers comprehensive service solutions, including planned maintenance, factory-direct parts, and 24/7 nationwide support to minimize downtime.

MANUFACTURING

Our equipment is proudly made in the USA, ensuring superior craftsmanship and reliability. Our skilled workforce and being ISO 9001 certified enables us to deliver innovative, durable solutions tailored to meet the unique needs of our customers.

FINANCING

Our flexible buying, rental, and lease options offer buyouts and rental assistance, servicing, fixed rates, tax advantages, freight costs, and Sourcewell advantages.

INSTALLATION

Our expert crews deliver turnkey installations with meticulous attention to detail, ensuring clean, operational sites and guaranteed satisfaction.

USED & REBUILT

We offer factory remanufacturing, with comprehensive services that restore equipment to like-new condition. Remanufactured equipment includes a factory warranty.

Engineering

At Sebright Products, Inc., we leverage technology to deliver exceptional, tailored solutions. Our engineering team uses 3-D software to create detailed, animated visualizations of each installation, ensuring precision and eliminating guesswork.

Our 3-D software allows us to simulate installation environments, identify potential challenges, and devise solutions before any physical work begins. With advanced features like real-time rendering and dynamic interaction, our engineers can manipulate and view models from multiple angles, ensuring proper planning and execution.

Each site has unique challenges and requirements. Our engineering team collaborates with customers to gather detailed information about the installation site, including spatial constraints and operational needs. Using this information, we create a customized model that serves as a blueprint for the entire project, guiding the design, fabrication, and installation processes.

Customers can expect a seamless and efficient installation experience with minimal disruption to their operations. Our detailed visualizations and animations enable proactive problem-solving and efficient project management, reducing the risk of errors and delays.

Manufacturing

At Sebright Products, craftsmanship and innovation define our approach to equipment manufacturing. Our equipment is proudly made in the USA, reflecting our commitment to superior quality, reliability, and performance.

We are also proud to be an ISO 9001 certified company, meeting the internationally recognized standard for quality management systems. This certification underscores our dedication to delivering high-quality, reliable products while continuously improving processes to meet customer needs.

Our highly skilled workforce combines technical expertise with a deep understanding of customer requirements to deliver engineered solutions that are both innovative and durable. Each system is precisely designed for its specific application.

Supported by advanced technology and state-of-the-art machinery, our manufacturing facilities uphold the highest standards of efficiency and precision. From cutting and welding to final assembly, every stage of production is executed with meticulous attention to detail. Quality is the foundation of our operations. Rigorous inspections and comprehensive testing ensure every piece of equipment meets our stringent standards and performs reliably in the field.

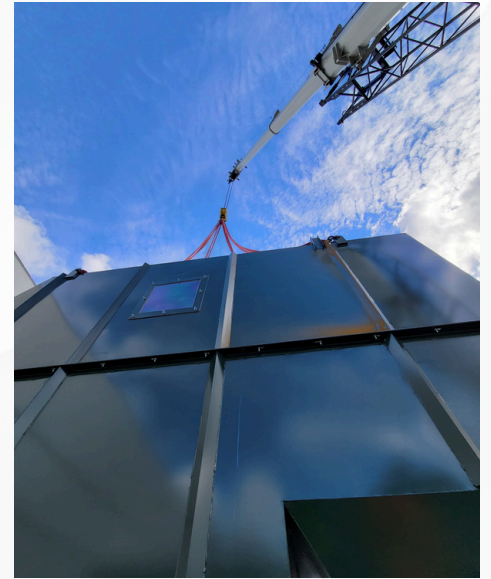

Partner with Sebright Products—where craftsmanship, innovation, and quality come together to deliver performance you can depend on.

Installation

Our expert crews deliver turnkey installations with close attention to detail, ensuring clean, operational sites and complete customer satisfaction from start to finish. Safety is always a top priority during installations, and our turnkey approach includes key installation standards such as Single Point of Contact, Quality Assurance, and Peace of Mind.

With over 50 years of proven industry experience, Sebright Products' installation capabilities provide exceptional, reliable installation services that ensure your equipment is installed correctly, safely, and ready for optimal performance.

Service

Our comprehensive service capabilities are designed to meet all your maintenance and repair needs, minimizing downtime and maximizing efficiency. Our Planned Maintenance (PM) program is specifically designed to extend the life of your equipment and ensure it operates at peak performance.

We provide factory-direct hydraulic, electrical, and mechanical parts, ensuring the longevity and durability our customers have come to expect. Using top-grade parts eliminates the need for frequent service calls and reduces long-term maintenance costs.

We have a nationwide network of qualified service companies working towards total customer satisfaction, ensuring minimized downtime and prompt service.

Products

COMPACTORS

Sebright Products' compactors revolutionize waste management by reducing volume and transportation costs, ensuring regulatory compliance, and offering customizable configurations. Reliable and efficient, robust designs for longevity, they streamline waste handling and provide significant cost savings.

RECYCLING EQUIPMENT

Efficient recycling solutions for professional performance, handling large volumes, extracting liquids, and prioritizing sustainability, empowering businesses for cleaner operations.

DEWATERING EQUIPMENT

Effective and robust dewatering equipment, including the Belt Filter Presses for wastewater treatment sludge and High Density Extruders - Dewatering Ram Press for handling coarse wet waste and process rejects, help ensure environmental stewardship and sustainability, while significantly reducing processing costs. Our dewatering equipment is available in 304 stainless steel.

AUXILIARY EQUIPMENT

Our innovative solutions streamline processes, enhance safety, and optimize efficiency. From customized hydraulic systems to specialized dumping solutions, Sebright's offerings empower businesses to improve operations and drive profitability.

LEAN MANUFACTURING

At Sebright Products, craftsmanship and innovation define our approach to equipment manufacturing. Our equipment we build is proudly made in the USA, reflecting our commitment to superior quality, reliability, and performance.

We are proud to be an ISO 9001 certified business, the internationally recognized standard for quality management systems (QMS). This significant milestone demonstrates Sebright's ongoing commitment to delivering high-quality, reliable products and continuously improving processes.

We invite you to partner with Sebright Products—where craftsmanship, innovation, and quality come together to deliver performance you can depend on.

High Density Extruder

LEARN MORE

Optimum ram press solution for dewatering

The High Density Extruder - Dewatering Ram Press is a leading solution for effectively removing liquids from various materials, including:

- Wet waste and waste by-products
- Canned Food Waste
- Paper mill secondary fiber rejects
- Pulp mill liquor knots
- Dairy products
- Hygiene/ hand wipes

This ram press offers unmatched and optimal liquid removal while accommodating a broad spectrum of materials.

The High Density Extruder excels in the toughest dewatering applications, providing superior results with minimal maintenance and downtime. We have custom equipment sizes to meet your site requirements!

Where can you find the High Density Extruder?

- Graphic Packaging
- Sonoco Products
- Fábrica de Papel
- Greif Inc.
- Papelera del Sur
- Kimberly Clark Corp.
- Pratt Industries
- Nine Dragons Paper
- Georgia Pacific Corp.
- International Paper
- Packaging Corp. of America
- And Many More!

Models:

- 2013X - Process ~ 2 cu. yd/hr
- 3024XS - Process ~ 9 cu. yd/hr
- 4030XS - Process ~ 17 cu. yd/hr
- 4060XS - Process ~ 33 cu. yd/hr
- 6260XS - Process ~ 55 cu. yd/hr
- 7860XS - Process ~ 104 cu. yd/hr

“Over 500 installations worldwide.”

Dave Kaminski

✉ dkaminski@sebrightproducts.com

📞 [\(980\) 328-1020](tel:(980)328-1020)

Product Manager for Dewatering & Recycling Solutions

Sebright Products' service team understands the unique demands that each industry faces. We partner with you to assess your waste and recycling challenges and deliver solutions tailored to your operation.

Our High Density Extruder division is led by our Product Manager **Dave Kaminski**, who brings 30 + years of experience in the pulp and paper industry. He is your contact for pulp and paper, and is here to assist with any equipment needs you may have.

His focus is helping customers achieve effective and repeatable results that will equate to substantial reductions in expenses associated with your plant's waste handling.

Belt Filter Press

LEARN MORE

Built for tough dewatering applications

Our Belt Filter Presses offer efficient dewatering solutions for various applications, including:

- Municipal wastewater treatment plants
- Pulp and paper facilities
- Food processing plants
- Dredging/dewatering lagoons
- Mining

Constructed with stainless steel components, our presses come in several models to suit different operational needs.

Our **mobile belt filter presses** are designed for flexibility and convenience, allowing for easy transport and setup at various locations, making them ideal for:

- Temporary projects
- On-site dewatering projects

Models:

- 0.6 m - Process ~ 80 GPM
- 0.8 m - Process ~ 160 GPM
- 1.0 m - Process ~ 120 GPM
- 1.2 m - Process ~ 200 GPM
- 1.7 m - Process ~ 220 GPM
- 1.7 xl - Process ~ 300 GPM
- 2.2 m - Process ~ 400 GPM
- 3.0 m - Process ~ 650 GPM

For stationary installations, Sebright Products builds **skid-mounted press systems or modular press configurations**. Both of these provide robust and stable solutions, ensuring reliable performance in permanent applications.

Additionally, we offer **rental belt filter presses**, providing an economical and scalable option for short-term projects or for facilities looking to test dewatering solutions before committing to a purchase.

Each Belt Filter Press is custom-designed, and units can be installed modularly.

Auto-Tie Balers

LEARN MORE

Proven baling technology built to last

Our auto-tie balers are engineered for durability and versatility. They produce compact, fully bound bales that optimize storage space and reduce transport costs.

Automated operation and customizable options include our patented Opticut shearing system, vertical and/or horizontal tying, and a special press ram for difficult-to-bale material.

Choose the AVOS Baler series for over 40 years of proven technology in reliable, high-performance waste management solutions.

Models:

- AVOS 88 - Process ~ 3 TPH
- AVOS 1211 - Process ~ 8 TPH
- AVOS 1410 BRH - Process ~ 10 TPH
- AVOS 1410 B5 - Process ~ 25 TPH
- AVOS 1810 B5 - Process ~ 40 TPH
- AVOS 2010 B5 - Process ~ 62 TPH

Product Highlights:

- Low power consumption
- Multiple configurations available
- Suitable for applications with limited space

MADE IN GERMANY

BaleWulf Balers

LEARN MORE

Two Ram & Closed Door Balers

BaleWulf Two Ram and Closed Door Balers have been designed with the user in mind. From the user-friendly touch screen menus, easy access maintenance features, to the customized commodity recipes.

These balers utilize low HP and low operating PSI to achieve target bale weights without putting undue stress on the baler. BaleWulf Balers are designed for long term operation with minimal maintenance.

Models:

- 4560 Closed Door
- 7060 Closed Door
- 4560 Two Ram
- 7060 Two Ram

Applications:

- OCC
- Paper
- Alum. Cans
- HDPE
- PET
- Plastic Film
- Tires
- Scrap Metal

Compactors

LEARN MORE

Smarter compaction for cleaner operations

Product Highlights:

- Over 100 models
- Industrial built
- ANSI rated
- Customizable configurations
- Stainless steel ram guide railings
- Criss-cross reinforcement rams
- Heavy duty cylinders
- Large oil reservoirs
- C-face adapter
- Site gage with thermometer temperature
- TEFC Motors
- Vane hydraulic pumps
- 2 wire braided hoses
- Remote pendant controls with mounted options

Stationary Compactor
2-7 cu. yard capacity

Self-Contained
Up to 2 cu. yard capacity

Stationary Self-Contained
1 - 6 cu. yard capacity

Auger Compactor
4 - 8 cu. yard capacity

Portable Compactor

Transfer Station
8 - 13 cu. yard capacity

Pre-Crusher
2.5 - 7 cu. yard capacity

Dumpers - Tippers

LEARN MORE

Optimize Material Dumping Solutions

Hydraulic Cart Dumpers/Tippers offer a reliable solution for efficient material handling, reducing back injuries, and cutting costs.

Customizable to accommodate various cart styles, these dumpers can lift carts up to 8,000 lbs. and reach heights over 30 feet.

Our Hydraulic Dumpers/Tippers are available in mild or stainless steel construction.

Models:

- CD Series
- HP Series
- HPV Series
- HL Series
- LA Series
- LP Series

Product Highlights:

- Live bottom scale
- High lift
- Customizable dumpers
- High quality
- Low profile
- Data Logging

Ideal For:

- Industrial Manufacturing
- Retail
- Healthcare
- Education

Conveyors

Our custom conveyors are able to handle every application. Featuring direct drive systems, modular in design, retro-fitted, and damage replacement. Our conveyors come in various lengths, widths, and designs, including enclosed or open stainless steel models.

Sizes:

- Up to 84" width
- Available in slider bed or chain driven models
- Pit conveyors available

Product Highlights:

- Efficient loading/transfer of materials
- Modular design for multiple applications
- Easy to upgrade & retrofit as needs change
- Able to replace sections when damaged

Applications:

- Distribution/fulfillment centers
- Manufacturing plants
- Materials recover facilities (MRF)
- Waste transfer stations

Carts

Custom material handling carts and trailers offer a durable, efficient solution for transporting materials to processing areas.

Product Highlights:

- Improves facility appearance
- Enhances operational efficiency
- Reduce labor & operational costs
- Reduce injuries

Applications:

- Apartment complexes
- Hospitals
- Malls
- Grocery stores/retail
- Airports
- Industrial manufacturing

Financing Options

Sebright Products understands that every business is unique. As a Sourcewell-approved vendor, we help simplify the procurement process by working closely with customers to evaluate operational needs, budget requirements, and long-term goals—ensuring a compliant, efficient purchasing path.

Direct Buy

Purchasing directly from Sebright Products offers the greatest value. Ownership allows for complete control over the equipment, customization options, and the ability to depreciate the asset over time.

Rentals

Renting equipment provides immediate access with minimal upfront costs and fixed monthly payments of ownership, featuring:

- 100% tax deductible
- Service/maintenance for the life of the term
- Cost predictability & budgeting accuracy
- All freight costs included
- Tax advantage (OPEX)
- Downtime Risk Transfer

Leasing

For businesses seeking long-term assets with financial flexibility, leasing options from Sebright Products provide an ideal solution.

- Quickly taking ownership of the equipment
- Predictable expense
- Simple \$1.00 buyout at end of the 60 month lease

Used & Rebuilt Equipment

Sebright Products specializes in offering a range of used and rebuilt equipment to provide cost-effective solutions that maintain high standards of quality and reliability.

Our factory remanufacturing process ensures that all equipment is restored to like-new condition, backed by a factory warranty. Each unit remanufactured is assigned a new serial number and undergoes thorough inspection and the replacement of damaged or worn parts such as ram tops, floors, and cylinders, followed by rigorous testing and repair of power units. Techniques like sandblasting, priming, and precision finishing are employed to enhance durability and appearance.

Choosing remanufactured equipment from Sebright Products offers significant cost savings compared to purchasing new, with units that not only function "like new" but also come with a six-month warranty. This reduces downtime and has become popular among rental companies that are seeking reliable equipment options.

Beyond financial advantages, our remanufactured solutions offer opportunities such as upgrading from existing compactors, potentially offering trade-in value, and enhancing handling capabilities to improve overall facility appearance.

Customer Testimonials

“The Sebright service and staff have been tremendous to work with, more so than any other company I've dealt with in the recycling industry.”

Steve Dornbush

Riverside Recycling LLC.

“We are very pleased with the quality of your products and service, as well as the professionalism of your company.”

Olive Paradise

Chelsea Catering

“Operation has been very reliable and has met all the performance specifications the manufacturer indicated.”

Steve Scott

Menasha Corporation

“The equipment is easy to use, the installation was trouble free, as is the ongoing functionality of the equipment.”

Darrian DeJong

Sub-Zero Group, Inc.

“I've been in the business for over 40 years and Sebright Products has never let me down. The product and maintenance has been really great. The support from Sebright has been far better than any company I've dealt with.”

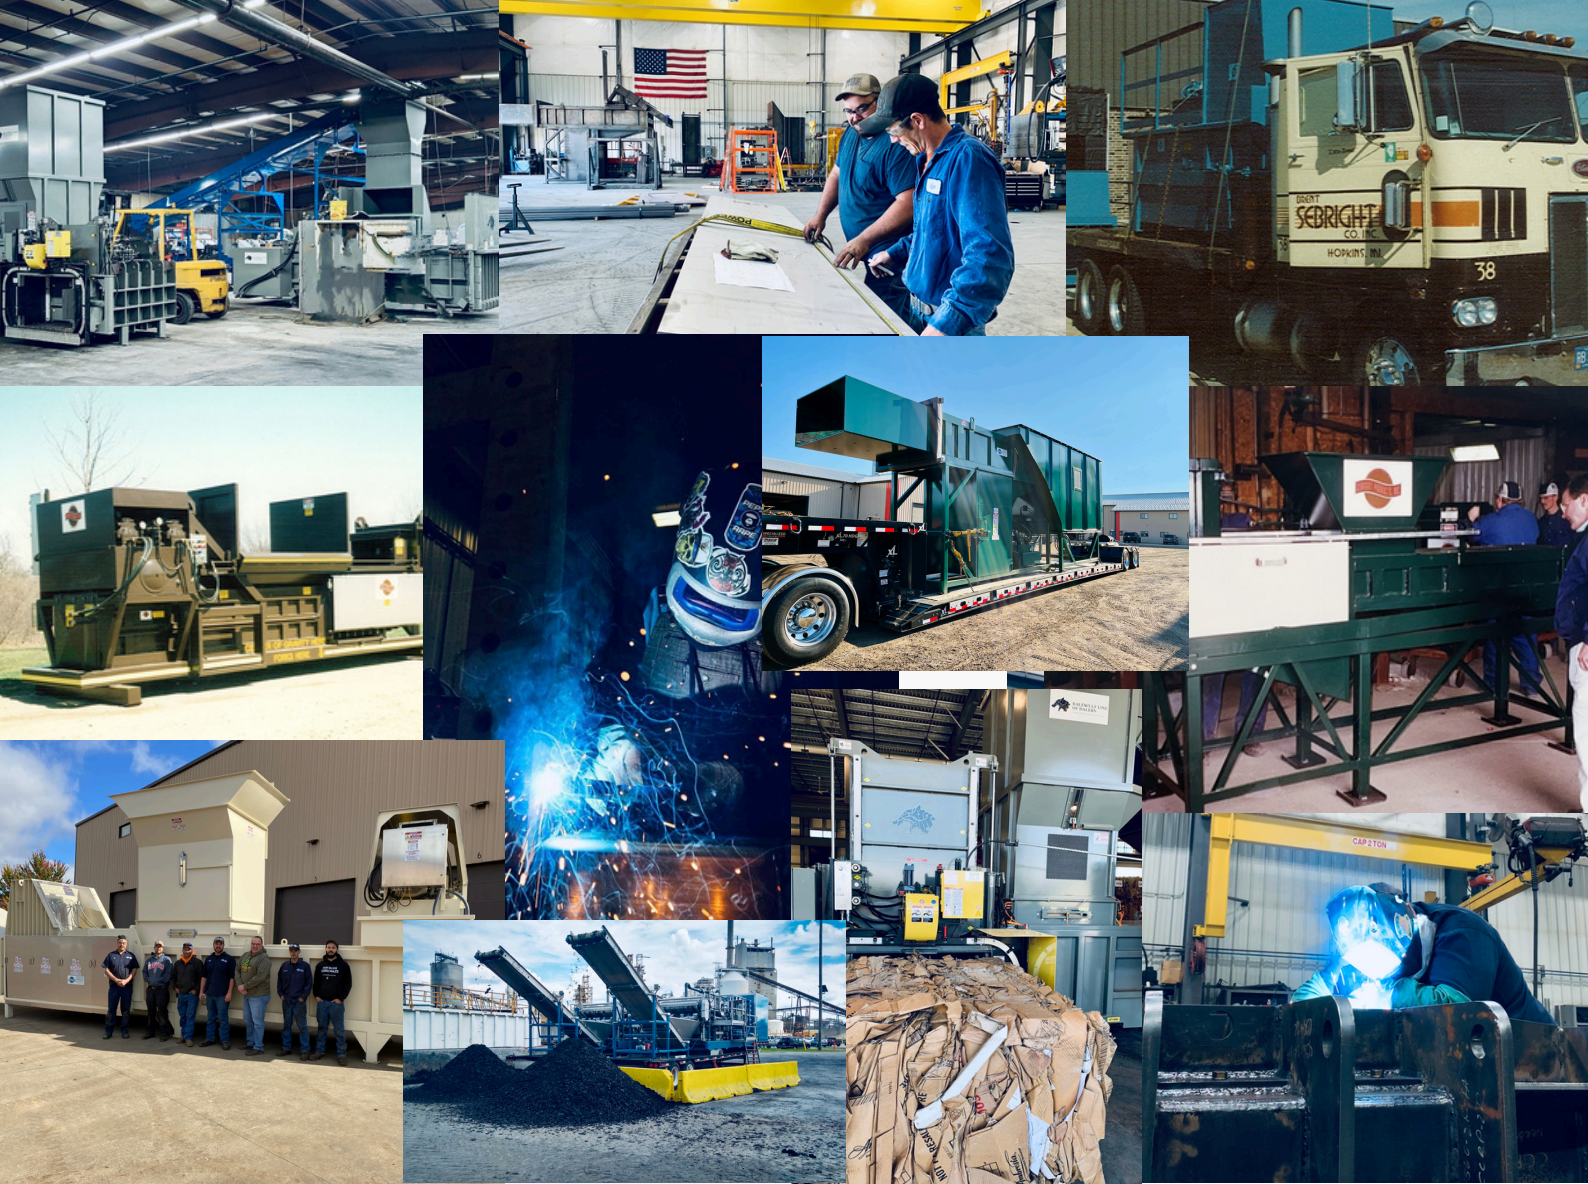

Richard Frade

Brask Enterprises

“The technology that they design her with, this XCYCLER I've never seen. I've been in technology for the past 20 years as well, and just looking at the detail behind this system is fabulous.”

Luke Fikejs
